

Pharmacy Dashboard

HIGHLIGHTS:

- **PMS Data**
Works with your existing PMS system.
- **Charts and Graphs**
Visual analysis of key metrics and trends.
- **AD Integration**
Active Directory integration for single sign on and security.
- **Real-Time**
Real-time view into Rx and workflow details.
- **18+ Dashboards Included**
18 dashboards out of the box that focus on key pharmacy areas.

Gain insight into your operational data and workflow with real-time, on screen KPIs and Metrics.

Decrease spending and improve operational workflow efficiencies. Our dashboard solution provides visibility into your PMS data for workflow processes, prescriptions, labor, inventory costs and more.

Keep an eye on important metrics with real-time charts, graphs, and KPIs. Drill down into the details with the click of a button and make informed decisions.

Dashboards:

Admits	New patient stats including admits by hour, month, day of week, admit types, and admits by facility
Billing	Detailed billing by facility, patient, Rx and drug. Includes method of payment, unbilled and transitional fills.
Dispense By Drug Group	Detailed list of dispenses by drug group, pharmacy, and facility.
Dispense History	Detailed list of dispenses including the top 50 drugs, year over year breakdown, zones, facilities, package types and more.
Dispense Last 90 Days	Lookback of dispenses for the previous 90 days, grouped by drug, package type, brand versus generic, DEA class, cycle fills and more.
ECS History	Electronic claims submission details including total claims, rejected claims, reject reasons and payors.
Facility	Facility map with active resident counts including contact details and average days of residents.
Inventory Dispense	Breakdown by NDC of inventory levels, 30, 60, 90, 120 day trends and top valuation to help with inventory replenishment decisions.
Inventory Detail	Detailed list of on hand quantity by NDC with bin location, manufacturer details, average package cost and last received dates.
Margin	Analysis of billing versus cost of goods for a period of time with margin, average margin and total billed script count. Includes margin of payor, margin by NDC and facility.
Pharmacists	Productivity for each pharmacist including profile and final reviewed. Track trends by day and by hour.
Pharm Tech – Prod	Productivity for each technician including packaging counts, toted counts, quality events and more.
Pharm Tech – OE	Productivity for each technician specific to order entry including order entry by hour, day and pharmacy.
Reorders	Reorder analysis to keep track of active orders, compounds, controlled substances, cycle fills and profile only.
Reorder Adherence Rates	Adherence by patient and payor with KPIs for controlled substances and underperforming facilities.
Returns	Medication return analysis including return reasons, facility return count, returns by drug, payor and patient.
Trending Revenue	Revenue trend by facility, method of payment and invoice group.
Workflow Intervals	Key metrics on workflow steps by day and time of day.

Built on technology you can trust for enterprise level performance and security.
